

BinWise

Time is precious,
Waste it Wisely

Conure's **BinWise** solution is an IoT-based end-to-end waste monitoring and management solution offering cities real-time operational intelligence to monitor, manage and optimize waste collection operations. **BinWise** solution gathers and collects data from different waste bins equipped with smart wireless sensors to show real-time fill-level information for each bin. **BinWise** helps cities in reducing OpEx through efficient resource and route planning, prepare for growing demands on waste management and delivering better quality of service.

**Real-time Bin
Level Status**

**Better Quality
Of Service**

**Efficient Resource
& Route Planning**

**Real-time
Alerts**
